Professional Summary

Computer Science Engineering student (CGPA 8.2/10) with hands-on experience in SQL-based data systems and Python-driven data analysis. Built a rule-based algorithmic trading model that processes live market data into actionable signals, and a relational database platform supporting high-volume transactional queries. Proficient in Excel and Power BI through academic coursework. Seeking an Analytics Internship to apply strong SQL, data analysis, and problem-solving skills to real-world business data.

Skills

Data & Analytics: SQL (queries, schema design, CRUD operations), Excel, Power BI (academic coursework), Python (data processing / analysis)
Programming Languages: Python, Java, C, C++, JavaScript
Web & Frameworks: Node.js, Express, HTML5, CSS3
Core Expertise: Data Structures & Algorithms, Database Management Systems, System Modeling (UML)

Projects

Automated Nifty Trading Bot
Python, Data Analysis, Technical Indicators

- Built a rule-based algorithmic trading system that analyzed price and volume data across Nifty 50 stocks, converting Moving Average and RSI indicators into actionable buy/sell signals through Python-based data processing.
- Backtested the strategy against historical market data in Jupyter Notebook, using a data-driven decision framework to evaluate signal reliability before simulated execution.

CodeMentor AI — Personalized Learning Platform
Data Visualization, Dashboarding, SQL

- Designed a data dashboard that visualized learning progress, completion rates, and engagement metrics across user tracks, giving users clearer visibility into performance trends through structured, state-driven data routing.
- Built an AI-assisted analytics sidebar that surfaced usage insights in real time, translating raw interaction data into contextual, actionable suggestions.

Library Management System
SQL, Database Reporting, Data Management

- Designed a relational database schema and SQL query layer supporting concurrent transactions, enabling fast, structured reporting on book inventory and client activity.
- Optimized CRUD operations and indexing to improve query efficiency, maintaining data accuracy across historical inventory records.

Education

Neil Gogte Institute of Technology
Hyderabad, India | 2023 – 2027
Bachelor of Engineering (B.E.) in Computer Science | CGPA: 8.2

Sri Chaitanya Junior College
Hyderabad, India | Passed: 2023
Intermediate Education | Academic Score: 90.9%

Sri Chaitanya High School
Kukatpally, India | Completed
Secondary School Certificate (SSC)
